

Project Fact Sheet

Development and Rehabilitation of Water and Electricity Networks in Nablus City

PROJECT AIM (OVERALL OBJECTIVE)

The project objective is to develop and Rehabilitate the water and Electricity Networks in Nablus City.

PROJECT DESCRIPTION

This project include the following activities:

1) Construction of 12" main Pipeline; 2) construction of 6" pipeline; 3) Rehabilitation of Beit Ain El-maa' booster station including construction of 1400CM water Reservoir and procurement of two boosters and replacement of old pipes. 4) Procurement of two pumping units for Deir Sharaf and al-Bathan wells in Nablus city. 5) The project also included procurement of electrical devices and equipments (\$ 872,500).

The original components of the project were all completed; however, there were some savings from the project and it was reprogrammed to construct a round water reservoir (2000 CM) and 1300 LM 6" pipe line.

OBJECTIVES

- To develop and rehabilitate the existing networks so that to enable the Municipality to better manage their water and electricity services and to provide more reliable services and reduce intermittent water supply and intermittent power supply.

IMPACT STATEMENT

- Improved capacity of Municipality of Nablus regarding project management in general and water supply management in particular;

THEMATIC AREA

Energy and Environment

SECTOR / SUB SECTOR

Human Settlement, Urban Development

PROJECT DETAILS

Project Number	00038709
Award Number	00035851
Duration	Sep 04 – Jun 07
Donor	Saudi Committee for Palestinian Relief
Partner	Municipality of Nablus

BUDGET

Total Budget	US\$2,308,770
Disbursement up to date	US\$2,262,901.26

Geographic Location

West Bank – City of Nablus

OUTPUTS

- Improved water supply services for Nablus city residents;
- Improved capacity and reliability of electricity networks;

CONSTRAINTS (if any)

N/A

Project Fact Sheet
